

Emails from Israel 2012

Introduction

We posted these quotes from our friends initially in 2012 on Facebook. After the start of the terrorist war against Israel in 2023 we are putting them on *rijo-research.de* again in order to show that the hatred of the Palestinians, fostered by other Arab tribes and the Iranians using them as their proxies, will never stop. That people is heading towards a catastrophe, in its path causing death and destruction to the innocent.

Quotes

M.L., November 20, 2012

I am sitting much of the time in the shelter. Last night was quiet but this morning, in one huge barrage, the Hamas terrorists fired 16 Grad missiles at us in Beer Sheva all at once. Except for 3 missiles, all were stopped by the Iron Dome. The three that were not stopped caused much physical damage, but thank heaven, everyone followed the instructions of the Home Front and there were no serious injuries.

M.L., November 21, 2012

We in the South are the closest and therefore the main targets. Beer Sheva gets as many as 20 Grad missiles an hour. Many did go North, and I sent my daughter off to Jerusalem for a little quiet. She and her flat mates have been prisoners in their own home for 8 days. They have to

wake up and get to their flat's safe area several times a night, and are not allowed to go out during the day. Not a healthy life for those kids!! There has been no school, no work, no university classes, lectures, events ... everyone must stay near a shelter and no groups larger than 50 people can gather at the same time. So far, we have had very few deaths, thanks be!!

M.M., November 21, 2012

The amazing thing is that we try not to hit civilians and spend endless amounts in trying to save our civilians. They try to hit civilians and also hide behind unprotected civilians and, then, we are to blame.
