

Recommendable hotels within or near Nuremberg's Old City

Allegedly this is the spot in the vaults of the medieval jail where delinquents received their last meal. To avoid similar conditions during a stay in Nuremberg, it could be wise to heed the following tips.

Online booking might be a thing technically convenient to do but tiny clips from city maps and self-advertisements regularly are not intended to inform a potential guest that “5 min from the center” means for Olympic athletes and “in a vivacious, youthful neighborhood” equals a four lane street edged with nightclubs right beneath the rooms’ windows and noisy outdoor events every week. Not even the official pricing necessarily is a criteria for the decision where to check in because most of the privately owned places are flexible about their fees when it comes to a talk on the phone - another argument against the global hotel chains if one is not addicted to the interchangeable design of the furniture, locker-like smell of the conditioned air and uniform taste of the breakfast rolls.

Nuremberg’s entire Old City with all its tourist sites is a pedestrian zone which due to its modest size easily can be explored by feet or public transport. For this reason it is a smart move to have a hotel in the heart of town where one is well connected by subway (underground) to any other destination within the city limits and beyond, too.

The following list is the result of years of testing by people whose judgment we trust blindly: Friends and acquaintances from all over the world who visited us over here. If you like to, become a member of this group of critical globetrotters by checking out these hotels and give us your feedback after having been there. Our part of the deal is to update the chart, also with new recommendations, and to keep an eye on their development as your local honorary travel agents.

Have a real good time in Nuremberg!
